CPT Plus Program The CPT Plus Program is designed to allow the customer to customize for their laboratory. Based on customer selection, the final CPT Plus price includes the Dimension chemistry analyzer and ancillary equipment, service, reagents, consumables, verifiers, and supplies. A Millipore water system and a one-year warranty are included. Please see the attached Product List for specific details of products included. Products not manufactured by Siemens Healthcare Diagnostics are not part of the CPT Plus Program.

CPT Plus Billing Process Requirements:

- Reagents will be invoiced when shipped. The price per pack will reflect the appropriate per-test price for the total number of tests in the pack.
- Supplies which are included in the CPT Plus will be shipped at no charge.
- Any other supplies/products not included in the CPT Plus will be invoiced at time of shipment.
- Full invoice payment is due no later than **30 days from invoice date**
- It is the responsibility of the customer to notify Siemens Healthcare Diagnostics of increases or decreases in volume so pricing can be adjusted to reflect the actual estimated volume.

Millipore System: A Millipore water system, appropriate for the size and number of analyzers, with a one-year warranty is included in the 5 year pricing. The Millipore system is manufactured and serviced by Millipore, therefore, any questions, service requests, and/or supply requests should be directed to Millipore by the customer, at the customer's expense. The first year of service from Millipore is Business Hours. Dimension Vista 1500 Millipore one-year warranty is included in the 5 year pricing and the first year of service from Siemens Healthcare Diagnostics will be 24/7.
includes:

- One Preventative Maintenance Visit
- Consumables for one year (at the volumes listed below)

Millipore PM Visit includes: Electronic and mechanical inspection, sanitation and performance analysis of membrane; sanitation of tank (if applicable), replacement of filters, and purification paks, as well as replacement of AFS product tubing. Pretreatment filters, and RO pretreatment pak are replaced. Confirm that all electronics are current version and that the system is operating within OEM specifications. Water chemistries will be performed including dissolved oxygen readings, bacteria readings, chlorine, silica and SDI testing.

Maximum Consumable Volumes for One Year		
Quantity	Item Number	Description
Millipore 3D		
2	CPAFS3PRM	Progard2, Bacteria Filter and Vent Filter
3	CP1ALLRES	AFS Cartridges
2	ZWAA57D5X	PM Visit including travel and labor
Millipore 8D		
3	CPAFS8PRM	Progard3, millipak 100, millex and tubing
3	CP2ALLRES	AFS Cartridges
3	PRPK00001	Pretreatment Cartridges
2	ZWAA57D5J	PM Visit including travel and labor
Millipore 16D		
4	CPAFS8PRM	Progard3, millipak 100, millex and tubing
6	CP2ALLRES	AFS Cartridges
4	PRPK00001	Pretreatment Cartridges
2	ZWAA57D5K	PM Visit including travel and labor

Maintenance and Repair / Service:

The customer is responsible for all daily, weekly and monthly routine operator maintenance and will record completion in maintenance log.

First year:	Dimension RxL Max (HM)	Full Service (24/7)
	Dimension Xpand Plus (HM)	Full Service (24/7)
	StreamLAB	Full Service (24/7)
	Dimension Vista 1500	Full Service (24/7)

Subsequent years: Select from the following options.

Full Service Agreement (24/7): includes preventive maintenance visits at the manufacturer's recommended intervals, unlimited service visits and all necessary replacement parts, excluding disposables and customer maintenance and operating supplies, twenty-four hours per day, seven days per week.

Business Hours Agreement: includes preventive maintenance visits at the manufacturer's recommended intervals, unlimited service visits and all necessary replacement parts, excluding disposables and customer maintenance and operating supplies, during normal business hours. Normal business hours are from 8:00 a.m. to 5:00 p.m. Monday through Friday, excluding holidays.

***Parts:** All parts are included except those which are supplied with the initial shipment and are meant to last through the life of the equipment. These items include but are not limited to tools, alignment gages and segments. Although necessary, these items are not critical to instrument operation.*

Service Requests/Technical Assistance:

Customer may contact the Technical Assistance Center (hotline) twenty-four hours per day, seven days per week.. Customers are requested to contact the hotline for all inquiries, including technical assistance and service requests. If a service visit is needed, or requested, the Field Service Representative (FSR) receives notification from the Technical Assistance Center and then calls the customer and determines if additional parts or other resources may be needed to perform the requested service. An on site visit is scheduled with the customer.

Technical Assistance Hotline: 1.800.441.9250 available 24/7

Shipping and Handling: **Standard Shipping and Handling**

Siemens Healthcare Diagnostics provides shipping and handling on routine shipments at no charge and applies to all 50 states, DC, and Puerto Rico.

Routine shipments are those that are placed using Siemens Healthcare Diagnostics's primary shipping modes: "DRD" (Dedicated Truck Fleet) or "Siemens Healthcare Diagnostics Select". The shipping mode for each customer is determined based on geographical location.

"DRD" (Dedicated Truck Fleet)

Siemens Healthcare Diagnostics uses dedicated fleets and other mode and carriers for delivery.

Locations that are receiving their shipments on the dedicated truck network will need to place their orders by the truck schedule for delivery the following week. The schedule is available online at www.siemens.com.

The order to delivery lead time for DRD service is a maximum of seven business days.

Siemens Healthcare Diagnostics Select

"Select is a Siemens Healthcare Diagnostics shipping process by which delivery is received within five business days of order placement. Siemens Healthcare Diagnostics utilizes ground or air carriers to deliver the order depending on the nature of the products shipped and the distance to be shipped.

The maximum delivery lead time for Siemens Healthcare Diagnostics Select service is five business days.

Expedited Shipping and Handling

Siemens Healthcare Diagnostics provides several additional methods for shipping and handling including:

- Two business day service
- Next business day service
- Next business morning service (where available)
- Saturday service (where available)
- Next Flight out service (where available)

Siemens Healthcare Diagnostics ships temperature controlled products that are restricted from shipping over weekends and holidays. An extra business day or two may be required for orders that are scheduled to be in transit over week ends or holidays.

Charges for Expedited Shipping and Handling Services.

The customer is responsible for all charges associated with expedited delivery. The charges are based on the net weight of the shipments.

Due to the complex nature of Siemens Healthcare Diagnostics's shipping (Refrigerated, frozen, dry ice, hazardous, infectious substances) the shipping and handling charges for each shipping condition offered (Next Business Day, etc) are based on the average cost of shipping and handling for the shipping condition. The charge is, on average, the difference between the Standard Shipping and Handling Cost, and the cost for Expedited Shipping and Handling.

Training:

Upon Installation - Siemens Healthcare Diagnostics Inc will provide training at the Siemens Healthcare Diagnostics manufacturing location for two operating personnel for the Dimension RxL Max and one operating person for the Xpand at no charge to the Government. This includes airfare, room and board.

Additional Training in years 2 through 5 - Siemens Healthcare Diagnostics will provide training at the manufacturer's facility for one operator per year (if requested by the customer). The Government agrees to cover airfare for the additional training. These classes cannot be carried over from one year to the next. Laboratories may train additional staff via **KnowItsm** online training (details below) at no charge. Any requested incremental training (above that mentioned above) is offered at prices below.

<u>Equipment</u>	<u>Training Location</u>	<u># of Days</u>	<u>Price</u>
RxL Max	Glasgow, Delaware	3.5	\$1,875*
Advanced RxL Max	Glasgow, Delaware	2	\$1,400*
Xpand Plus	Glasgow, Delaware	3	\$1,400*
StreamLAB	Glasgow, Delaware		On Site
Dimension Vista 1500	Glasgow, Delaware		\$2,500*

**prices do not include airfare*

KnowItsm interactive e-learning brings a virtual classroom right to your lab, providing a convenient and cost-effective way to move your staff up the learning curve quickly and manage long term knowledge development. Ready and available, KnowItsm offers employees the flexibility to complete the course at his/her own pace and as schedules allow. It provides an interactive learning experience with instant feedback, reinforcement and motivation. Each module features pre and post-tests to measure performance. Test scores are then stored in a database. Online at www.siemens.com

Available for RxLMax and Xpand Plus.

- Pre-training prior to attending a Siemens Healthcare Diagnostics Class
- A tool with which classroom attendees can provide customer training back in the lab for the rest of the staff
- A quick reference and refresher tool

Compliance - Should the Customer fail to purchase in any calendar quarter at least three (3) times the Estimated Monthly Commitment for tests in the aggregate or for any of the individual categories or products set forth therein, listed on Attachment A, Siemens Healthcare Diagnostics, in addition to such other rights as are available by law, reserves the right to a) increase the minimum number of tests required for any subsequent periods to compensate for the shortfall, and/orb) immediately adjust the prices for any subsequent period to the appropriate tier on the Federal Supply Schedule based on the actual average volume and c) bill the Customer for the Minimum Monthly Fee according to the formula below for any months where Estimated Monthly Commitment was not met. New pricing and commitment amounts will be provided on an addendum. A signed addendum to the original contract with the new committed volume and pricing will be required.

Minimum Monthly Fee Formula -

The amount of the cost of the use of the Equipment and service will be divided by the total Estimated Monthly Commitment of Tests as revised for the change in Test purchases. This amount ("Surcharge") is then added to the base reagent prices for which you are eligible according to the Federal Supply Schedule tiers based on the actual average volumes. The Customer acknowledges that the cost of your use of the Equipment is included in the price of the Tests

Exclusions: Items not manufactured by Siemens Healthcare Diagnostics, those not include on the Products List attached, product necessary for open channel or user defined tests, relocation of equipment, biomedical engineer training, Millipore service after the one year warranty and Millipore support are excluded from the CPRR Program.

Siemens Healthcare Diagnostics Chemistry / Immunochemistry

The Dimension Vista® 1500 Intelligent Lab System

In 2006, Siemens Healthcare Diagnostics introduced the Dimension Vista® 1500 Intelligent Lab System, a fast, discrete ultra-integrated analyzer with four detector systems (IMT, Photometric, Nephelometric and Luminometer) to seamlessly process a full menu of over 100 tests, covering routine chemistries, specialty chemistries, cardiacs, STATs, DAUs, TDMs, endocrinology, plasma proteins, highly sensitive LOCI™ immunoassays and eventually fertility, cancer markers, anemia, and infectious disease testing - at the same time. Again, there is no reagent preparation and no pretreatment of any sample. This completely integrated approach means less sample splitting and aliquots in the lab. There is no need to connect to any other instruments to complete test menu as the integration of the detectors are designed into the system. No other modules are required. A broad test menu is available, including general chemistry, diabetes monitoring, therapeutic drug monitoring, drugs of abuse, special chemistry, thyroid, cardiac markers, toxicology, electrolytes, anemia, immunosuppressive drugs, and plasma protein.

the next level of integration on a Dimension
Integrated Chemistry Immunoassay System?

Dimension® *EXL*™

Chemistry and Immunoassay testing on one analyzer for lower cost of ownership

- ◆ Heterogeneous immunoassay module for true integration
- ◆ More than 90 available assays without the need for additional analyzers
- ◆ Easy stable and convenient FLEX reagent concept
- ◆ Photometry and QuikLYTE I.M.T. onboard
- ◆ Maximum productivity from one of the smallest footprints in the industry
- ◆ May be upgradeable to include a future immunoassay technology*

*under development – not available for sale.

Dimension[®] Xpand

The Dimension Xpand Plus integrated chemistry system is the first to combine comprehensive chemistry and STAT heterogeneous immunoassay testing on a single platform to provide an unbridled workhorse for the low to mid volume testing laboratory with a small footprint.

Dimension[®] RxLMax[™] integrated chemistry system

The Dimension RxLMax integrated chemistry system allows for the simultaneous processing of chemistries and immunoassays assuring fast TAT . An extensive menu provides more answers and more options from one tube on one platform to streamline workflow.

Dimension[®] RxLMax Suite[™] integrated chemistry system

The Dimension RxLMax Suite includes the Reagent Management System (RMS) which increases onboard capacity up to 88 Flex Reagent Cartridges, allows for rapid loading of cartridges decreasing set up time and dedicated hydration of reagents ensuring optional processing efficiency and decreased turn around time.

Automation / Robotics

StreamLAB™ Analytical Workcell ***Automated Sample Processing and Analysis***

The StreamLAB™ Analytical Workcell is complimentary to the Dimension RxL Max™ instrumentation. Dimension RxL Max™ instruments are connected to the StreamLAB™ system to provide a fully automated workcell which consolidates pre- and post-analytical functions. In high volume labs, this type of process enhancement improves efficiency, and reduces labor requirements. Each placement of StreamLAB™ is customized, as it is scalable to fit the size and throughput requirements of individual laboratories. The components are consistent but in different quantities and configurations.

Customized CPT Plus Pricing Worksheet

Equipment and Service

1. Select Total Term of Agreement

(Across the top of CPT Plus Instrumentation and Service Pricing Grid)

Term is subject to annual appropriation of funds. This agreement does not obligate funds.

2. Select Instrumentation and any Accessories and list the monthly amount for each item below. Multiply by the quantity required for the each to obtain a total amount for each line.

(From CPT Plus: Instrumentation Pricing Grid based on selected term)

Equipment	\$	X	QTY		
\$ _____		X	_____	=	\$ _____
\$ _____		X	_____	=	+\$ _____
\$ _____		X	_____	=	+\$ _____
\$ _____		X	_____	=	+\$ _____

3. Total Instrumentation \$ _____ Sum Total =\$ _____
(Sum of items listed in #2)

4. Total Annual Instrumentation \$ (x12) X (#of Years) \$ _____
(#3 multiplied by 12) X (# of Years)

5. Monthly Instrument \$: Multiply #4 by current Money Factor \$ _____
(obtain money factor from Siemens Healthcare Diagnostics)

6. Select Required Service. List the monthly amount for each item below, multiply by the quantity required for the each to obtain a total amount for each line.

(From CPT Plus: Service Pricing Grid based on selected term)

Service/ \$	X	QTY		
\$ _____	X	_____	=	\$ _____
\$ _____	X	_____	=	+\$ _____
\$ _____	X	_____	=	+\$ _____
\$ _____	X	_____	=	+\$ _____

7. Total Service \$ _____ Sum Total =\$ _____
(Sum of items listed in #6)

8. Monthly Instrument and Service \$ _____
(Add #5 and #7)

9. Total Instrumentation and Service \$ (x12) \$ _____
(Multiply #8 x12)

10. Total Photometric Annual Tests _____
(List total tests per year)

11. Surcharge per Test _____
(#9 Divided by #10)

Chemistry CPT Plus Pricing

This pricing includes calibrators, verifiers and supplies (See Product List for items included)

12. Use total annual tests to determine price per test (for each individual method in) for the panels/categories for methods listed in CPT Plus: Reagent Pricing Grid Group A and Group B:

Comprehensive Metabolic Panel	Specialty Tests
Drugs of Abuse	TDM
Routine Chemistry	AMY & MG
Category 7	AHDL
hsCRP	ALDL

****Methods included in all panels or categories are outlined in Reagent Category Schedule****

13. Use total annual tests for each specific method to determine price per test for methods listed in CPRR: Reagent Pricing Grid Group C:

14. TOTAL CPT Plus Prices:

(Add #11 to each method price in #12 AND #11 to each method price in #13)

CPT Plus Program: Monthly Instrumentation Pricing

Instrumentation:

All figures are monthly amounts and do not include service or money factor / interest. Figures have been rounded and may vary slightly

Dimension - Government Reagent Pricing Schedule for 2006 - 2011
 Cost per Test PLUS Pricing

Cost per Test Plus pricing includes reagents, calibrators, consumables, verifiers, and supplies.

Group A Tests

Tests are priced based on total photometric volume and include reagents, calibrators, consumables, verifiers, and supplies.

Total Photometric Tests	Compre-hensive Metabolic Panel	Routine Chemistry	Electro lytes	Stream-Lab Supplies per Test
			Off List Price	
50,000- 359,999	\$ 0.112	\$0.128	-55%	
360,000 - 899,999	\$ 0.096	\$0.108	-45%	\$ 0.0150
900,000 -1,999,999	\$ 0.082	\$0.093	-40%	\$ 0.0150
2.0MM -- 4.4 MM	\$ 0.068	\$0.083	-35%	\$ 0.0150

Group B Tests

Tests are priced based on total photometric volume and include reagents, calibrators, consumables, verifiers, and supplies.

Total Photometric Tests	Specialty Chemistry	TDM	Drugs of Abuse	Amylase & Magnesium	AHDL	Cat 7	Cardio-Phase hsCRP & hsCRP	ALDL
50,000- 359,999	\$ 1.003	\$ 1.831	\$ 1.000	\$ 0.578	\$ 0.578	\$ 2.440	\$ 4.551	\$ 2.888
360,000 - 899,999	\$ 0.903	\$ 1.708	\$ 0.854	\$ 0.546	\$ 0.545	\$ 2.318	\$ 4.453	\$ 2.616
900,000 -1,999,999	\$ 0.818	\$ 1.585	\$ 0.780	\$ 0.512	\$ 0.512	\$ 2.135	\$ 4.271	\$ 2.399
2.0MM -- 4.4 MM	\$ 0.744	\$ 1.488	\$ 0.709	\$ 0.479	\$ 0.480	\$ 1.831	\$ 4.026	\$ 2.235

Notes and Conditions:

Prices do not include instrument and/or service surcharge.
 It is the responsibility of the customer to notify Dade Behring of changes in volume so prices may be adjusted to reflect the actual estimated volume.

CPT Plus Program: Reagent Pricing for RxL, RxLHM, Xpand Plus and Xpand Plus HM(cont'd)

Group C Tests

Tests are priced based on the total photometric volume and include reagents, calibrators, consumables, verifiers, and supplies.

Total Photometric Volume	50,000 - 359,999	360,000 - 899,999	900,000 - 1,999,999	2MM - 4.4MM
Troponin	\$ 3.421	\$ 2.964	\$ 2.679	\$ 2.391
Troponin (low-volume)	\$ 3.570	\$ 3.094	\$ 3.094	\$ 3.094
Ferritin	\$ 2.052	\$ 1.766	\$ 1.540	\$ 1.263
Free T4	\$ 2.082	\$ 1.547	\$ 1.251	\$ 1.086
HCG	\$ 2.439	\$ 1.964	\$ 1.606	\$ 1.349
HCG (low-volume)	\$ 2.439	\$ 1.963	\$ 1.963	\$ 1.963
MMB	\$ 2.083	\$ 1.665	\$ 1.429	\$ 1.219
MMB (low-volume)	\$ 2.083	\$ 1.666	\$ 1.666	\$ 1.666
Myoglobin	\$ 4.530	\$ 4.027	\$ 3.601	\$ 3.095
Total PSA	\$ 3.575	\$ 3.245	\$ 2.915	\$ 2.527
Free PSA	\$ 5.438	\$ 5.130	\$ 4.589	\$ 4.301
TSH	\$ 1.653	\$ 1.367	\$ 1.139	\$ 1.004
HAIC	\$ 3.938	\$ 3.569	\$ 3.308	\$ 2.893
Cyclosporine	\$ 13.679	\$ 13.114	\$ 12.537	\$ 11.391
CyclosporineA Extended Range	\$ 13.680	\$ 13.114	\$ 12.539	\$ 11.391
NT-proBNP	\$ 15.057	\$ 14.357	\$ 13.610	\$ 13.091
NT-proBNP (low volume)	\$ 15.057	\$ 14.355	\$ 14.355	\$ 14.355
Tacrolimus	\$ 13.453	\$ 12.965	\$ 12.469	\$ 12.215

Notes and Conditions:

Prices do not include instrument and/or service surcharge.

It is the responsibility of the customer to notify Dade Behring of changes in volume so prices may be adjusted to reflect the actual estimated volume.
